About the Speaker

Waishan is an urban researcher and designer. His research utilizes spatial analysis, sensing technology, and AI to improve mobility, shareability, and sustainability. He has been involved with various data-driven research and smart city projects worldwide in places like Saudi Arabia, the United Arab Emirates, the U.S., and China. Before joining HKU, he was an Associate at McKinsey & Company. He obtained a Ph.D. in Regional Science'22 from Cornell University.

Waishan actively participates in many publications, lectures, and exhibitions. He co-instructed design workshops for digital conferences including the CAADRIA 2021-2023 and the Digital Futures 2020. He co-authored papers and was a reviewer for top-ranking journals like Landscape and Urban Planning, Sustainable Cities and Society, Cities, and Journal of Transport Geography. His exhibitions included '3RD VISION' for the 2019 Shenzhen-Hong Kong Bi-City Biennale of Urbanism\Architecture (UABB), Housing+ Biennale (2017) at MIT, and 'the Big Data, Visualization, and Society' (2016). Waishan was also an entrepreneur and honoree of Forbes China 30U30 (2019).
